Test Review for Bacteria and Viruses Answer Section

Lysogenic cycle- Other viruses insert their genetic information into the cell's chromosomes. At some point, these viruses can also use the cell to produce more viruses, destroying the cell. 19. Bacterial infections are caused by bacteria either breaking down the body's tissues for food or releasing harmful toxins into the

body.

## **Chapter 19: Viruses - John A. Ferguson Senior High ...**

Aug 16, 2017 · Chapter 19: Viruses Overview  
Experimental work with viruses has provided important evidence that genes are made of nucleic acids. Viruses were also important in working out the molecular mechanisms of DNA replication, transcription, and translation. Viruses have been important in the development of techniques of manipulating and transferring genes.
