**Loser – Literature Kit Gr. 5–6** Nat Reed 2007-02-01 In this State Standards-aligned Literature Kit™, we divide the novel by chapters or sections and feature reading comprehension and vocabulary questions. In every chapter, we include Before You Read and After You Read questions. The Before You Read activities prepare students for reading by setting a purpose for reading. They stimulate background knowledge and experience, and guide students to make connections between what they know and what they will learn. The After You Read activities check students' comprehension and extend their learning. Students are asked to give thoughtful consideration of the text through creative and evaluative short-answer questions and journal prompts. Also included are writing tasks, graphic organizers, comprehension quiz, test prep, word search, and crossword to further develop students' critical thinking and writing skills, and analysis of the text. About the Novel: *Loser* chronicles the childhood of Donald Zinkoff who is one of the most unusual, endearing characters ever to grace the pages of a novel for young readers. No matter what the game, Donald never wins. He trips over his own feet, constantly raises his hand without ever knowing the correct answer, and falls down laughing at the mention of any unusual word. The novel traces

Donald's journey from first to sixth grade. It details his important friendships, marks his relationships with different teachers, and describes how he copes with various shortcomings that everyone but Donald and his parents deem terribly important. "Loser" is an excellent novel which deals sensitively with the human spirit and the importance of failure. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy.

*Teaching Reading in the Content Areas* Vicki Urquhart 2012 History teachers aren't expected to teach science, math teachers aren't expected to teach social studies; so why are all teachers responsible for teaching reading? The answer is simple. An emphasis on reading and literacy skills in the content areas has an exponential effect on learning in every discipline. This completely revised third edition of the best-selling *Teaching Reading in the Content Areas* seeks to help educators understand how to teach reading in their respective disciplines, choose the best reading strategies from the vast array available, and positively impact student learning. Throughout, it draws from new research on the impact of new technologies, the population boom of English language learners, and the influence of the Common Core State Standards. Given the complexities of the reading process, teachers deserve--and this book provides--clear, research-based answers to overarching questions about teaching reading in the content areas: \* What specific skills do students need to read effectively in each content area? \* Which reading strategies are most appropriate to help students

become more effective readers and independent learners?  
\* What type of learning environment promotes effective reading and learning? By focusing on the differences in how content-area experts read and reason, teachers can be better prepared to help their students understand that the ways they read in biology are different from the ways they read in English, history, or mathematics. To read successfully in different content areas, students must develop discipline-specific skills and strategies along with knowledge of that discipline. With that in mind, this book also includes 40 strategies designed to help students in every grade level and across the content areas develop their vocabularies, comprehend informational and narrative texts, and engage in meaningful discussions of what they read.

Provides a hands-on resource useful to both novices and experts for technology-enabled teaching and learning Gives both discipline-specific and cross-disciplinary perspectives Discusses discipline-specific mobile applications Offers an opportunity to meet the needs of contemporary learners and foster their competencies as lifelong learners Addresses emerging issues in technology and pedagogy
