[Isis Unveiled](#) H. P. Blavatsky 2012-09 Isis Unveiled is a classic spiritual book written by Helena Petrovna

Blavatsky of The Theosophical Society. This Isis Unveiled contains new calculations of the yugas by Sri

Yuktswar author of The Holy Science. The Veil of Isis, Blavatsky's Secret Doctrine on A Mastery Key to the

Mysteries of Ancient and Modern Science and Theology is her opus. It encompasses a thorough

examination of religion, spirituality, yoga, Sanatana dharma, kabbalism and Christianity. MAKE SURE YOU

GET BOTH VOLUMES OF ISIS UNVEILED: Book I ISBN: 1939199042 & Book II ISBN: 1939199077 to help

answer the question: "Does God Really Exist"? This is a question that has been asked since the beginning of

time and probably will not be answered until the individual comes face to face with the Truth! However, if a

critical examination on the subject matter is what you're looking for then there probably is no better source

than "Isis Unveiled." This book is an exhaustive effort to discuss man, life and Spirit from as many angles as

possible; from all ancient cultures, myths, religions and scientific perspectives. This book goes in depth to

explore man's place in the world, how we all relate to one another and what connects us all. For the mystic,

that answer is undeniably that we are all part of One Source, One Essence and One Spirit. Supported by

extensive evidence from religious, esoteric and mystical traditions and classical scholarship, these volumes

aid the student in detecting the vital principles which underlie the philosophical systems of old. Volume I

consists of two books focusing on prevailing scientific theories balanced with Ancient Universal Wisdom

Religion. Volume II's two books examine the creeds of religions past and present, alongside the myths and

symbols of various cultures. Throughout, the author strikes at the root of dogma and affirms the 'paramount

importance of any religion' for the individual to "Know Thyself!" After reading this classic book with a new

translation and modernization, you will see how although time, cultures and languages may change - Truth

is Eternal! Take this journey through history touching upon the wealth of spiritual knowledge from the

Hindus, Chaldeans and Egyptians to Kabbalism, Christianity and Science. Enjoy the travels through the

legendary Lemuria and Atlantis to the Mayans with quotes from Plato, the Chaldean Oracles, the Egyptian

Book of the Dead, the Bible, Pythagoras, Apollonius of Tyana, the Popol Vuh, Paracelsus, Giordano Bruno,

Marco Polo, Jesus the Nazarene, Siddhartha Gautama, Zoroaster, Hermes Trismegistus and Max Muller, as

well as Buddhist, Brahmanical, Chinese, Persian, Babylonian, Syrian, Gnostics and so much more.

Ultimately, it is the yogi who tells us that to the disbeliever there will never be substantial enough evidence

to convince the doubter. However, for those who aren't merely skeptics but have a sincere thirst for Truth,

then only by going within will you ever be quenched! Isis Unveiled is the rapid river leading you to the

water within... it is up to you to drink! For those that don't know, Blavatsky is very advanced reading for

spiritual students. It is NOT the type of book you read from front cover to back. You must take your time

with this reading. You should use the table of contents and/or index to go to the subject you have interest

in, read it and let it digest. As time goes on and you experience more life then you will find yourself coming

back to various subjects and gaining something new with each reading! "Many rivers... One Ocean; many

branches... One Tree; many paths... One Destination; many stories... One Truth!" 1 S.O.U.L. Publishing

[Faith and Physics](#) Joseph Paul Befumo 2007-04 Can educated people embrace the concepts of spirituality,

mysticism, paranormal phenomena, and even magic in light of the overwhelming and undeniable tenets of

modern science? As revealed in this book, the answer is a resounding yes . Faith and Physics takes the

reader on a step-by-step journey through the often startling world of modern physics, showing how recent

scientific evidence not only supports, but in many cases, demands an acceptance of spiritual, mystical, and

paranormal principles. If you, like many modern people, have yearned to believe in something beyond the

mundane day-to-day physicality of life, but have feared that to do so would be tantamount to intellectual

suicide, this book will prove that you need not choose between modern certainty and mystical doctrine, for

both are completely consistent.
