been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world."

No Way to Pick A President

Jules Witcover 2014-04-23 As the United States marks its first presidential election of a new century, Witcover shows us how professional mercenaries -- with little party loyalty and diminished political principles, driven by an insatiable need for money -- are poisoning public life. At the same time, politicians themselves have condoned and even encouraged these developments, responding to the demands of a media-driven age in which the press corps pursues its own quest for celebrity and financial reward. Sharp, revealing, and rich with anecdotes, No Way to Pick a President offers a wealth of presidential history, from the role of the vice president's office to campaign funds,

Secure Programming with Static Analysis Brian Chess

2007-06-29 The First Expert Guide to Static Analysis for Software Security! Creating secure code requires more than just good intentions.

Programmers need to know that their code will be safe in an almost infinite number of scenarios and configurations. Static source code analysis gives users the ability to review their work with a fine-toothed comb and uncover the kinds of errors that lead directly to security vulnerabilities. Now, there's a complete guide to static analysis: how it works, how to integrate it into the software development processes, and how to make the most of it during security

code review. Static analysis experts Brian Chess and Jacob West look at the most common types of security defects that occur today. They illustrate main points using Java and C code examples taken from real-world security incidents, showing how coding errors are exploited, how they could have been prevented, and how static analysis can rapidly uncover similar mistakes. This book is for everyone concerned with building more secure software: developers, security engineers, analysts, and testers.

Katie's Cabbage Katie Stagliano 2014-12-12 Katie's Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie's Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can

help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of *Greek Revival from the Garden: Growing and Cooking for Life*, offers a foreword about her friendship with Katie and her admiration of Katie's dream to end hunger one garden at a time.
