Tidelands Philippa Gregory 2019-08-20 This New York Times bestseller from “one of the great storytellers of our time” (San Francisco Book Review) turns from the glamour of the royal courts to tell the story of an ordinary woman, Alinor, living in a dangerous time for a woman to be different. A country at war A king beheaded A woman with a dangerous secret On Midsummer’s Eve, Alinor waits in the church graveyard, hoping to encounter the ghost of her missing husband and thus confirm his death. Until she can, she is neither maiden nor wife nor widow, living in a perilous limbo. Instead she meets James, a young man on the run. She shows him the secret ways across the treacherous marshy landscape of the Tidelands, not knowing she is leading a spy and an enemy into her life. England is in the grip of a bloody civil war that reaches into the most remote parts of the kingdom. Alinor’s suspicious neighbors are watching each other for any sign that someone might be disloyal to the new parliament, and Alinor’s ambition and determination mark her as a woman who doesn’t follow the rules. They have always whispered about the sinister power of Alinor’s beauty, but the secrets they don’t know about her and James are far more damning. This is the time of witch-mania, and if the villagers discover the truth, they could take matters into their own hands. “This is Gregory par excellence” (Kirkus Reviews). “Fans of Gregory’s works and of historicals in general will delight in this page-turning tale” (Library Journal, starred review) that is “superb... A searing portrait of a woman that resonates across the ages” (People).

Flemish Manuscript Painting in Context Elizabeth Morrison 2007-01-08 A companion to the Getty’s prize-winning exhibition catalogue Illuminating the Renaissance: The Triumph of Flemish Manuscript Painting in Europe, this volume contains thirteen selected papers presented at two conferences held in conjunction with that exhibition. The first was organized by the Getty Museum, and the second was held at the Courtauld Institute of Art under the sponsorship of the Courtauld Institute and the Royal Academy of Arts. Added here is an essay by Margaret Scott on the role of dress during the reign of Charles the Bold. Texts include Lorne Campbell’s research into Rogier van der Weyden’s work as an illuminator, Nancy Turner’s investigation of materials and methods of painting in Flemish manuscripts, and trenchant commentary by Jonathan Alexander and James Marrow on the state of current research on Flemish illumination. A recurring theme is the structure of collaboration in manuscript production. The essays also reveal an important new patron of manuscript illumination and address the role of illuminated manuscripts at the Burgundian court. A series of biographies of Burgundian scribes is featured.

Wealth Creation in the World's Largest Mergers and Acquisitions B. Rajesh Kumar 2018-11-29 This book highlights research-based case studies in order to analyze the wealth created in the world’s largest mergers and acquisitions (M&A). This book encourages cross fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger’s success. The book should be useful for finance professionals, corporate planners, strategists, and managers.

Image-Guided Cancer Therapy Damian E. Dupuy 2013-08-06 Image-Guided Cancer Therapy: A Multidisciplinary Approach provides clinicians with in-depth coverage of the growing, dynamic field of interventional oncology.

Combining the knowledge of expert editors and authors into one powerhouse reference, this book looks at tumor ablation, HIFU, embolic therapies, emerging technologies, and radiation therapy throughout the body (liver, bone, breast, gynecologic and prostate cancers, to name just a few), and includes discussion of different imaging modalities. In the words of Peter Mueller, MD, author of the book’s Foreword: “... The senior authors are all world renowned experts in interventional oncology, which is another example of the high quality authorship and experience that is brought to this book. The later chapters discuss therapies that are simply not covered in any other source. Everyone who is doing or wants to do ablation therapies and interventional oncology will face a time when they will be asked to use their expertise in less used and less investigated areas. There is nowhere else where the reader can get information on the prostate, breast, and gynecologic areas, and especially pediatrics...This book is an outstanding contribution to the literature and will become a ‘must read’ for all physicians who are interested in Interventional Oncology.”

Fungal Infections Complicating COVID-19 Martin Hoenigl 2021-05-05 Coronavirus disease 2019 (COVID-19), caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), spread globally to pandemic proportions. Although the majority of cases have asymptomatic or mild infections, a significant proportion of cases progress to severe pneumonia and acute respiratory distress syndrome requiring critical care. Opportunistic infections following severe respiratory viral infections have been recognized since the 1918 influenza pandemic. Among critically ill patients with COVID-19, secondary fungal infections caused by *Aspergillus* and *Candida* spp. are increasingly described, affecting up to 30% of COVID-19 patients requiring intensive care treatment. This collection of manuscripts focuses on fungal infections complicating COVID-19, including immunological mechanisms and pathogenesis, diagnosis, and treatment.
