Google Earth Engine Applications Lalit Kumar 2019-04-23 In a rapidly changing world, there is an ever-increasing need to monitor the Earth's resources and manage it sustainably for future generations. Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard. Satellite-based earth observation has advanced rapidly over the last 50 years, and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte-scale. An ever-increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud-based computing platform that was established by Google to support such data processing. This facility allows for the storage, processing and analysis of spatial data using centralized high-power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment, and gross primary productivity, among others. Datasets used range from coarse spatial resolution data, such as MODIS, to medium resolution datasets (Worldview -2), and the studies cover the entire globe at varying spatial and temporal scales.

By Nightfall Michael Cunningham 2010-09-28 Peter and Rebecca Harris: mid-forties denizens of Manhattan's SoHo, nearing the apogee of committed careers in the arts—he a dealer, she an editor. With a spacious loft, a college-age daughter in Boston, and lively friends, they are admirable, enviable contemporary urbanites with every reason, it seems, to be happy. Then Rebecca's much younger look-alike brother, Ethan (known in the family as Mizzy, "the mistake"), shows up for a visit. A beautiful, beguiling twenty-three-year-old with a history of drug problems, Mizzy is wayward, at loose ends, looking for direction. And in his presence, Peter finds himself questioning his artists, their work, his career—the entire world he has so carefully constructed. Like his legendary, Pulitzer Prize-winning novel, *The Hours*, Michael Cunningham's masterly new novel is a heartbreaking look at the way we live now. Full of shocks and aftershocks, it makes us think and feel deeply about the uses and meaning of beauty and the place of love in our lives.

The Last Pictures Trevor Paglen 2012-09-19 Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. *The Last Pictures*, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning

signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer and MacArthur "Genius" Fellow Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize contemporary civilizations. Consequently, *The Last Pictures* engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. Assessing Health Outcomes Among Veterans of Project SHAD (Shipboard Hazard and Defense) National Academies of Sciences, Engineering, and Medicine 2016-02-15 Between 1963 and 1969, the U.S. military carried out a series of tests, termed Project SHAD (Shipboard Hazard and Defense), to evaluate the vulnerabilities of U.S. Navy ships to chemical and biological warfare agents. These tests involved use of active chemical and biological agents, stimulants, tracers, and decontaminants. Approximately 5,900 military personnel, primarily from the Navy and Marine Corps, are reported to have been included in Project SHAD testing. In the 1990s some veterans who participated in the SHAD tests expressed concerns to the Department of Veterans Affairs (VA) that they were experiencing health problems that might be the result of exposures in the testing. These concerns led to a 2002 request from VA to the Institute of Medicine (IOM) to carry out an epidemiological study of the health of SHAD veterans and a comparison population of veterans who had served on similar ships or in similar units during the same time period. In response to continuing concerns, Congress in 2010 requested an additional IOM study. This second study expands on the previous IOM work by making use of additional years of follow up and some analysis of diagnostic data from Medicare and the VA health care system.

Installation art and the museum Vivian van Saaze 2014-03-15 Installation art has become mainstream in artistic practices. However, acquiring and displaying such artworks implies that curators and conservators are challenged to deal with obsolete technologies, ephemeral materials and other issues concerning care and management of these artworks. By analysing three in-depth case studies, the author sheds new light on the key concepts of traditional conservation (authenticity, artists intention, and the notion of ownership) while exploring how these concepts apply in contemporary art conservation. Based on original empirical research and cross-case analysis, this ground-breaking study offers a re-examination of traditional conservation values and ethics, and argues for a reassessment of the role of the conservator of contemporary art.

9/11 and the Visual Culture of Disaster Thomas Stubblefield 2014-12-17 "[An] insightful view on how 9/11 is perceived in American society—the day that 'refuses to enter history,' the tragedy that 'has, in effect, not yet passed.'" —Journal of Popular Culture The day the towers fell, indelible images of plummeting rubble, fire, and falling bodies were imprinted in the memories of people around the world. Images that were caught in the media loop after the disaster and coverage of the attack, its aftermath, and the wars that followed reflected a pervasive tendency to treat these tragic events as spectacle. Though the collapse of the World Trade Center was "the most photographed disaster in history," it failed to yield a single noteworthy image of carnage. Thomas Stubblefield argues that the absence within these spectacular images is the paradox of 9/11 visual culture, which foregrounds the visual experience as it obscures the event in absence, erasure, and invisibility. From the spectral presence of the Tribute in Light to Art Spiegelman's nearly blank New Yorker cover, from the elimination of the Twin Towers from TV shows and films to the monumental cavities of Michael Arad's 9/11 memorial, the void became the visual shorthand for the incident. By examining configurations of invisibility and erasure across the media of photography, film, monuments, graphic novels, and digital representation, Stubblefield interprets the post-9/11 presence of absence as the reaffirmation of national identity that implicitly laid the groundwork for the impending invasions of Iraq and Afghanistan. "A concise, engaging, and thought-provoking work that asks the reader to reassess their knowledge and relationship to that moment and the resulting milieu of post 9/11 life in America." —ARLIS/NA Reviews "Extraordinarily brilliant . . . will change how we think about disasters and tragedies. The book is a must-read for both students and practitioners of media studies." —Repository

He Knows Her Name Kelly McCorkle Parkison 2016-05-03 There are an estimated 20 million orphans in the country of India. Thanks to Kelly and Scott Parkison, that number has decreased by one. Then one day when she has a run in with a procession of Night Marchers, ancient Hawaiian spirits wandering from their burial grounds to their locations of battles past, Emma has no choice but to believe that the unbelievable does exist. Now Emma must go on the run with the help of a mysterious stranger, as they seek out how to free Emma from the curse of a Night Marcher, who will stop at nothing to get her soul.

The Gender Game Bella Forrest 2017-07-04 The Gender GameBy Bella Forrest
Ever Faithful David Sartorius 2014-01-10 Known for much of the nineteenth century as "the ever-faithful isle," Cuba did not earn its independence from Spain until 1898, long after most American colonies had achieved emancipation from European rule. In this groundbreaking history, David Sartorius explores the relationship between political allegiance and race in nineteenth-century Cuba. Challenging assumptions that loyalty to the Spanish empire was the exclusive province of the white Cuban elite, he examines the free and enslaved people of African descent who actively supported colonialism. By claiming loyalty, many black and mulatto Cubans attained some degree of social mobility, legal freedom, and political inclusion in a world where hierarchy and inequality were the fundamental lineaments of colonial subjectivity. Sartorius explores Cuba's battlefields, plantations, and meeting halls to consider the goals and limits of loyalty. In the process, he makes a bold call for fresh perspectives on imperial ideologies of race and on the rich political history of the African diaspora.
